

## CLEANING YOUR HOSPITALITY BUSINESS DURING THE PANDEMIC

With many of our hospitality clients preparing to re-open their properties to guests, we wanted to reassure you that using **ENJO** is still **the safest and most effective way to deep-clean your surfaces**.

If you're already using **ENJO** products to clean your property then you'll know how effective they are for regular cleaning - in fact **six times more effective than traditional cleaning products**. Please be assured that you can continue to use your ENJO products as the foundation of your Covid-safe preparations, as you look forward to welcoming guests back to your business.

In accordance with Government guidance, you should **continue using your usual ENJO cleaning products** but clean more frequently, particularly in areas of high contact such as door handles, lift buttons and switches.

If there is a suspected case of Covid-19 among your guests then there are some additional decontamination procedures to follow, including disinfection, and the Government has issued specific advice on this here. In this instance you should still perform your initial clean using your ENJO products as this is the **best way to deep clean surfaces in preparation for disinfection**.

If you are required to decontaminate your property after a suspected case of Covid-19, it is vital to remember that there is a difference between cleaning and disinfecting - they are two distinct and different processes. To be effective, each process must be done properly. **You can read more about this in our blog.**

### SUMMARY OF GOVERNMENT GUIDANCE

Requirement	Step 1 - Deep Clean with ENJO	Step 2 - Disinfect
Standard / normal housekeeping	✓	✗
Decontamination <b>after</b> a suspected case of Covid-19	✓	✓
